Abstract

Background. Background goes here. *Methods.* Methods go here. *Results.* Results here.

Conclusions. Conclusions here.

Keywords: Diabetes, access to care, inflammation, health, Mexico, China

Word count: X (this cannot easily be done automatically, we can also just leave it out)

Relations between Inflammation, access to care and Diabetes in two representative populations of China and Mexico.

The descriptive statistics for our sample look as follows:

Table 1

Descriptive statistics.

	Mexico
N_{total}	2094
Sex	
male	836 (39.90 %)
female	1254 (59.90 %)
unknown	4 (0.20 %)
Age	67.80 ($SD = 9.10$)
Diabetes	
diagnosed	327 (15.60 %)
undiagnosed	205 (9.80 %)
